TOPTICA expands Scientific Sales in the US Michael Holmes, PhD to serve as Scientific Sales Director.

TOPTICA Photonics, Inc. a leading laser manufacturer, recently hired Michael Holmes as their new Scientific Sales Director. Dr. Holmes will develop and manage all aspects of TOPTICA's scientific sales in the United States.

"We are excited to have Michael join our team of professionals," said Mark Tolbert, president of Toptica Photonics, Inc. "Michael's strong, hands-on experience continues to demonstrate our commitment to the scientific marketplace. We were delighted to find a team player who, through his own research, gained a strong understanding of our customers' needs".

Dr. Holmes received his PhD from the University of Rochester with a background in laser cooling and ultra-cold atom physics. At his most recent employer, he was the eastern regional sales manager where he was already successful at becoming both a partner and a resource to his scientific customers. In his new position, he will continue to do so, expanding TOPTICA's leadership position for the scientific laser market further.

TOPTICA develops, manufactures, services and distributes technology-leading diode and fiber lasers and laser systems for scientific and industrial applications. Sales and service is offered worldwide through TOPTICA Germany and TOPTICA USA, as well as all through 13 distributors. A key point of the company philosophy is the close cooperation between development and research to meet our customers' demanding requirements for sophisticated customized system solutions and their subsequent commercialization.
